

Rules as data (YAML)

37 metres and gaṇa classes; prāsa and yati rules with profiles

Compiler → DAWG

grammars → NFA → DFA
→ minimal: 1,431 states,
370,315 legal lines

Sound engines

yati (sandhi modes)
and prāsa; strict /
relaxed / historical

Enforcer (in the decoding loop)

live DAWG states per open slot + prāsa and yati registers;
a token is allowed only if the poem can still be completed
(viable_prefix / next_symbols): masking · backtracking · hybrid

scores ⇌ allowed tokens

Autoregressive

Gemma-4 E4B,
26B-A4B;
subword tokens

Block diffusion

DiffusionGemma
26B-A4B; frozen-
prefix canvas

Masked diffusion

pilot120m (ours),
120M; one token
per akṣara

poem
